

We claim:

1. A tongue color device comprising
a main housing (10, 12),
a lollipop secured to an upper end of the body,
the lollipop comprising candy with different colors of non-
toxic dyes which will color a person's tongue with different colors
during consumption.

2. A tongue color device as set forth in claim 1, in which
said housing includes a main portion and an upper portion.

3. A tongue color device as set forth in claim 2, in which
said upper portion of said housing has a nipple to which the
lollipop is molded.

4. A tongue color device as set forth in claim 3, in which
said nipple has an aperture therein.

5. A tongue color device as set forth in claim 3, in which
said upper portion of said housing is removable.

6. A tongue color device as set forth in claim 2, in which
said upper portion (12) of said housing includes an aperture
therein, and

a lollipop on a stick is secured to said upper portion by insertion of said stick into said aperture.

7. A tongue color device as set forth in claim 6, in which said upper portion of said housing is removable.

8. A tongue color device as set forth in claim 5, in which said main housing includes at least one battery therein, said at least one battery supplies a source of power to operate a light bulb, and

a switch for controlling the source of power to the light bulb.

9. A tongue color device as set forth in claim 6, in which said main housing includes at least one battery therein, said at least one battery supplies a source of power to operate a light bulb, and

a switch for controlling the source of power to the light bulb.

10. A tongue color device as set forth in claim 7, in which said main housing includes at least one battery therein, said at least one battery supplies a source of power to operate a light bulb, and

a switch for controlling the source of power to the light bulb.

11. A tongue color device as set forth in claim 5, in which said main housing includes a longitudinal slot therein, a coloring cartridge in said main housing in alignment with the slot, and

a button secured to a lower end of the coloring cartridge for sliding the cartridges upward out of the upper housing through the aperture therein.

12. A tongue color device as set forth in claim 7, in which said main housing includes a longitudinal slot therein, a coloring cartridge in said main housing in alignment with the slot, and

a button secured to a lower end of the coloring cartridge for sliding the cartridges upward out of the upper housing through the aperture therein.

13. A tongue color device as set forth in claim 8, in which said main housing includes a longitudinal slot therein, a coloring cartridge in said main housing in alignment with the slot, and

a button secured to a lower end of the coloring cartridge for sliding the cartridges upward out of the upper housing through the aperture therein.

14. A tongue color device as set forth in claim 9, in which said main housing includes a longitudinal slot therein,

a coloring cartridge in said main housing in alignment with the slot, and

a button secured to a lower end of the coloring cartridge for sliding the cartridges upward out of the upper housing through the aperture therein.

15. A tongue color device as set forth in claim 10, in which said main housing includes a longitudinal slot therein, a coloring cartridge in said main housing in alignment with the slot, and

a button secured to a lower end of the coloring cartridge for sliding the cartridges upward out of the upper housing through the aperture therein.

16. A tongue color device as set forth in claim 2, which includes

a clasp secured to the upper portion,
a chain connected to the clasp, and
a clasp secured to the chain.

17. A tongue color device as set forth in claim 3, which includes

a clasp secured to the upper portion,
a chain connected to the clasp, and
a clasp secured to the chain.

18. A tongue color device as set forth in claim 5, which includes

a clasp secured to the upper portion,
a chain connected to the clasp, and
a clasp secured to the chain.

19. A tongue color device as set forth in claim 7, which includes

a clasp secured to the upper portion,
a chain connected to the clasp, and
a clasp secured to the chain.

20. A tongue color device as set forth in claim 8, which includes

a clasp secured to the upper portion,
a chain connected to the clasp, and
a clasp secured to the chain.
